Note: Basic engines and reman engines are generic engines. The engines are complete internally; however, externally all parts are not supplied with the engines. Check the configuration of the engine being removed, with the configuration of the engine being installed. For any external components not supplied with the engine being installed, reuse those parts from the engine that has just been removed. Do not return the old engine, until the unit is reassembled.

Note: Basic engines and reman engines are generic engines. The engines are complete internally; however, externally all parts are not supplied with the engines. Check the configuration of the engine being removed, with the configuration of the engine being installed. For any external components not supplied with the engine being installed, reuse those parts from the engine that has just been removed. Do not return the old engine, until the unit is reassembled.
